CRIMES AND OFFENSES

Offenses Against Public Order and Safety: Amend Part 1 of Article 3 of Chapter 11 of Title 16, Title 17, and Article 72 of Chapter 18 of Title 50 of the Official Code of Georgia Annotated, Relating to Wiretapping, Eavesdropping, Surveillance, and Related Offenses, Criminal Procedure, and When Public Disclosure of Agency Records is Not Required, Respectively, so as to Provide Improved Processes and Procedure for Law Enforcement During the Execution of Their Official Duties and for the Release of Information to the Public; Provide For Law Enforcement Officials to Record Matters Occurring in Private Places or During the Execution of a Search Warrant; Require a Procedure for Enhancing Witness Identification Accuracy; Provide for Definitions; Provide For Written Policies Relating to Witness Identification Protocol; Provide for Policy Requirements; Prohibit Suppression of Evidence Under Certain Circumstances; Change Certain Provisions Relating to the Release of Certain Audio and Video Recordings; Provide for Related Matters; Provide for Effective Dates; Repeal Conflicting Laws; and for Other Purposes

CODE SECTIONS: O.C.G.A. §§ 16-11-60, -62 (amended); 17-5-21 (amended); 17-20-1, -2, -3 (new); 50-18-72 (amended)

BILL NUMBER: SB 94
ACT NUMBER: 173
GEORGIA LAWS: 2015 Ga. Laws 1046
SUMMARY: The Act allows a law enforcement officer, in the course of his or her official duties, to use devices to videotape or record the activities of a person. Public disclosure of agency records related to audio and video recordings from law enforcement devices is not required except in certain circumstances. The Act requires law enforcement agencies to adopt written

79
policies and procedures for witness identification of a suspected perpetrator. The Act provides a number of required policies that law enforcement agencies must incorporate into their procedures.

**EFFECTIVE DATE:**

**History**

Eyewitness identification is not foolproof. Witnesses can misidentify innocent people in police line ups or in photographs. That misidentification can lead to a wrongful conviction and an innocent person in jail. When a witness is asked to make a suspect identification in a live or photographic line up, law enforcement personnel or the line up procedures can influence the outcome. Law enforcement personnel may consciously or unconsciously encourage

events in Ferguson, Missouri and “across the county,” HB 430 also provided that law enforcement officers could use devices (body cameras), in the course of their official duties, to record the activities of other persons.15 Body cameras have garnered some public support with the growing number of police-involved fatal shootings.16 Many police departments are already using the technology.17 HB 430 never passed the House,18 but SB 94 carried portions of HB 430 into law.19

Bill Tracking of SB 94

Consideration and Passage by the Senate

Majority Leader Bill Cowsert (R-46th) and Senator Charlie Bethel (R-54th) sponsored SB 94.20 The Senate read the bill for the first time on February 10, 2015.21 The bill was assigned to the Senate Judiciary Non-Civil Committee, and the Committee favorably reported the bill by substitute on February 24, 2015.22

The Committee’s changes were minor, removing a provision requiring law enforcement agencies to provide written copies of their new policies to the Georgia Peace Officer Standards and Training Council.23 The substitute also added a provision providing that a
court may consider the failure to comply with the bill in relation to the exclusion of identification evidence; however, such failure does not automatically require exclusion.24 The Senate read the bill for the second time on February 25, 2015.25 The Senate read the bill for the third time and unanimously passed the bill on February 26, 2015.26

Consideration and Passage by the House

Representative Alex Atwood (R-179th) sponsored SB 94 in the House of Representatives.27 The bill was read for the first time on March 2, 2015, and was assigned to the House Judiciary Non-Civil Committee.28 The bill was read for the second time on March 3, 2015.29 On March 19, 2015, the House Committee favorably reported the bill by substitute.30 The House Committee made several substantial changes to the bill.31 For example, Committee Chairman Rich Golick (R-40th) moved to amend SB 94 to include HB 430, and the Committee approved the amendment.32 However, the House Committee made no substantive changes to the existing language of SB 94.33 On March 24, 2015, Representatives Chuck Efstration (R-104th), Sharon Cooper (R-43rd), and Golick offered a floor amendment.34 This amendment renumbered several sections and removed a section specifying qualifications for investigators employed by district attorneys.35 The House adopted the floor ammendment.
amendment, read the bill for the third time, and passed it by a vote of 137 to 29.\textsuperscript{36}

*Reconsideration and Passage by the Senate*

When the Senate reconsidered the bill as passed by the House, Senators Bethel and Jesse Stone (R-23rd) proposed an amendment to the bill.\textsuperscript{37} Majority Leader Cowsert proposed a minor amendment to Senators Bethel and Stone’s amendment.\textsuperscript{38} Senators Bethel and Stone’s initial amendment removed lines one through 1079, all provisions relating to searches with and without a warrant.\textsuperscript{39} The amendment replaced these provisions with a change to Code section 17-5-21 clarifying that intangible things, information, or data could be included as evidence of a crime.\textsuperscript{40} The amendment also removed all provisions related to wiretapping, eavesdropping, and surveillance;\textsuperscript{41} it replaced them with an amended definition for “private place” in Code section 16-11-60;\textsuperscript{42} and it clarified circumstances in which eavesdropping, surveillance, or communication interception is lawful.\textsuperscript{43} Further, the amendment changed the effective dates by making all provisions effective on July 1, 2015, except Section 4, which becomes effective July 1, 2016.\textsuperscript{44} The Senate adopted both amendments, and the amended bill passed the Senate by a vote of 48 to 4.\textsuperscript{45} It was the returned to the House for a vote on the Senate amendments.\textsuperscript{46}

Reconsideration and Passage by the House

The House agreed to the Senate’s amendments and passed SB 94 by a vote of 100 to 65. On April 9, 2015, the bill was sent to Governor Nathan Deal (R), and it was signed into law on May 6, 2015.

The Act

The Act amends Article 3 of Chapter 11 of Title 16, Title 17, and Code section 50-18-72 of the Official Code of Georgia Annotated. The Act attempts to increase identification of witnesses through new processes and procedures and allow police officers to wear body cameras during their official duties while providing improved public disclosure.

Section 1 of the Act amends the definition of “private place” to mean a place where “there is a reasonable expectation of privacy.” Section 2 of the Act revises paragraph (2) of Code section 16-11-62 to allow a law enforcement officer or his or her agent to use a device while performing his or her official duties to observe, photograph, videotape, or record activities of people in the presence of the officer. These two sections were originally a part of HB 430.

Section 3 of the Act expands paragraph (5) of subsection (a) and subsection (b) of Code section 17-5-21, which relates to grounds for issuance of a search warrant, to include “instruments, articles or things, any information or data, and anything that is tangible or intangible, corporeal or incorporeal, visible or invisible” as evidence to show probable cause. This change allows for video footage to be included as evidence of a crime. Furthermore, Section 3 of the Act allows for the use of any device by a peace officer executing a search warrant.

55. See id.
warrant or other personnel assisting in the execution of such warrant.  

Section 4 of the Act adds three new Code sections: 17-20-1, 17-20-2, and 17-20-3. These Code sections provide policies for law enforcement agencies to implement when conducting “live lineups, photo lineups, or “showups . . . .” The purpose behind the procedures is to implement the best practices and to protect the rights of those accused of crimes. Additionally, new Code section 17-20-3 allows the court to consider a failure to comply with requirements of the written policies when there is a challenge to an identification procedure, however, “such failure shall not mandate the exclusion of identification evidence.” This section gives the courts power to suppress or exclude evidence of an identification based on failure to meet the written policies’ minimum requirements.

Section 5 of the Act adds a new paragraph prohibiting public disclosure of audio and video recordings taken by law enforcement officers where there is a reasonable expectation of privacy and no pending investigation. This paragraph helps ensure the privacy of individuals who are recorded in areas where there is a reasonable expectation of privacy, such as a private residence.

58. O.C.G.A. § 17-20-2 (Supp. 2015). A showup is an identification procedure where a witness is presented with a single individual and asked to verify that the individual is the offender. O.C.G.A. § 17-20-1(5) (Supp. 2015). Law enforcement agencies must adopt written policies to include the minimum number of fillers in a live lineup or photo lineup and how each live lineup, photo lineup, or showup should be conducted. O.C.G.A. § 17-20-2 (Supp. 2015).
59. See Electronic Mail Interview with Sen. Charlie Bethel (R-54th) (June 11, 2015) [hereinafter Bethel Interview].
60. O.C.G.A. § 17-20-3 (Supp. 2015).
61. House Video, supra note 4, at 34 min., 15 sec. (remarks by Sen. Charlie Bethel (R-54th)).
62. See O.C.G.A. § 50-18-72(a)(26.2) (Supp. 2015). The new paragraph only allows for the following six people to gain access to the records:
   (A) A duly appointed representative of a deceased’s estate when the decedent was depicted or heard on such recording; (B) A parent or legal guardian of a minor . . . ; (C) An accused in a criminal case . . . [where] such recording is relevant to [the] criminal proceeding; (D) A party to a civil action . . . [where] such recording is relevant to the civil action; (E) An attorney for any . . . persons identified in (A) through (D) . . . ; or (F) An attorney for a person who may pursue a civil action . . . [where] such recording is relevant to the potential civil action.

63. See, e.g., House Video, supra note 4, at 57 min., 8 sec. (remarks by Rep. Ed Setzler (R-35th)).
Analysis

Consequences for Witness Identification

The Act’s purpose in regard to witness identification was to codify best practices so that the rights of the criminally accused are protected.64 Gwinnett County District Attorney Danny Porter noted that this Act was years in the making and has been the culmination of meetings with the Georgia Association of Criminal Defense Lawyers, experts at the Innocence Project, and experts in the field of eyewitness identification.65 The Act’s policies ensure the reliability of eyewitness identification.66 One unforeseen consequence of the Act might be the cost of training personnel to properly follow the new standards, but very little training should be needed because the Act is an attempt to codify best practices.67

Intended Consequences for Police Officer Body Worn Cameras

Parts of HB 430 were incorporated into SB 94 because of national movements to hold police more accountable in light of fatal police-shooting.68 Body cameras can expose officer misconduct, improve officer training, provide evidence for trials, and increase accountability and transparency among law enforcement agencies and their communities.69 These benefits will help build trust between police and the community.70 Similar motivations led the United Kingdom to adopt mandatory body cameras for their police several years ago.71 The increased prevalence of police-worn body cameras in the United Kingdom helped “speed[] up justice,” protect victims,
and defuse potentially violent situations. The goal of the Act is to help reduce instances of officer–civilian conflict.

**Unintended Consequences for Police Officer Body Worn Cameras**

Now that officers are allowed to wear body cameras during the course of their official duties, several unintended consequences could result: (1) a lack of privacy to the citizens, (2) public access to footage, and (3) the questionable objectivity of the video footage when used as evidence.

First, because the officers are allowed to use body cameras at any time during the course of their official duties, any interaction with an officer could be recorded, including interaction that occurs where citizens expect personal privacy, such as in a’ home. These concerns were debated in the House Non-Civil Judiciary Meeting on March 18, 2015, but the Committee determined that having video footage outweighed privacy concerns. Second, the Act grants certain public persons access to videos taken where a reasonable amount of privacy is expected. Furthermore, it is not clear if those filmed will be allowed to request deletion of the footage of private places by officers. This uncertainty may lead to unintended violations of privacy or the Fourth Amendment.

Finally, the reliability of the video footage itself is a concern. The ’objectivity of video footage in light of its technical limitations is

73. See House Video, supra note 4, at 53 min, 12 sec. (remarks by Mr. Danny Porter, Gwinnett County District Attorney). Support for a reduction in officer-civilian conflict has been demonstrated in a study conducted in Rialto, California where officers were randomly assigned to wear a body camera system. Michael D. White, Police Officer Body-Worn Cameras: Assessing the Evidence 17 (2014), available at https://www.ojpdiagnosticcenter.org/sites/default/files/spotlight/download/Police%20Officer%20Body-Worn%20Cameras.pdf. The study found that “shifts without cameras experienced twice as many incidents of use of force as shifts with cameras.” Id. at 20.

one concern. The Supreme Court has relied on video footage to determine if a police officer was justified in using potentially deadly force in response to a high-speed chase. However, an empirical study has shown that even video footage is subject to multiple interpretations depending on the cultural outlook of the individual viewing the video. Therefore, those viewing the footage in a court could be susceptible to their own biases, leading to inconclusive or false determinations of what actually happened based only on that video footage.
