Introduction, Scope, and Jurisdiction

This is a research guide focusing on the creation and maintenance of a small legal practice. This guide is intended to be a resource for young attorney’s interested in starting their own business to practice law. It contains the necessary materials, to be used as a starting point in guiding the first six months of preparation. For someone looking to specialize in a particular practice area, or incorporate under a more complex corporate structure, additional research may be necessary.

As with any business, there are many aspects that go beyond merely providing a service to a consumer. Even the best attorney, without adequate business savvy, can helm an unsuccessful practice. The creation of this guide is aimed to provide a would be solo practitioner with the tools, not only to thrive in limited practice areas of the law, but also insight into some of the areas that are less intuitive in running a business as compared to the actual services provided.

This research guide is broken into three sections by practical competency. The first, titled “Getting Started: Formation and Resources” provides the reader with resources on how to operate a law practice in Georgia. This section offers information on corporate structure and the legal requirements to operate them, as well as literature on creating a business plan for the firm in question.

The second section, titled “Practice Maintenance” equips the reader with information regarding some of the softer elements of private practice. It contains information on keeping your bar license current, to accounting requirements for certain practice areas. It also provides pertinent information on malpractice insurance, and various practical aids such as calculating billing rates and advertising. Finally it contains a copy of the Georgia code of ethics guiding attorney behavior.

Finally, the third section, titled “Limited Appendix and Form Bank” provides the would-be solo practitioner with information useful in their early practice of law. This includes a number of simple forms in the practice areas limited to Probate Law, Uncontested Divorce, Entity Formation, and Transactional Contract Drafting. While not an exclusive source, this bank is intended to provide skeletal form and substance outlines to the new attorney in simple practice as they take on their first clients.

This guide will be most useful for a recent graduate with limited experience and resources. For established attorneys looking for resources regarding complex corporate structures or niche practice areas, additional research outside of this guide may be required.

2. First Start Business Guide.
   - From the office of the Secretary of State Brian P. Kemp. This 39 page resource provides directories and contact information to all regulatory agencies regarding small businesses in the state of Georgia. Among them, this guide provides in detail the necessary requirements in creating a business entity depending on the type of structure the business will take on, as well as the relevant contacts and information needed to fulfill these obligations. It provides fee schedules for licensing as well as information regarding state EIN and TIN (Taxpayer Identification Numbers) which are required by all businesses in the state of Georgia. This is the perfect resource to educate oneself on the necessary requirements to start a business in Georgia

3. Federal Employer Identification Number
   - This IRS site is geared towards all tax related inquiries one would have regarding requirements for a solo practice. This includes the application for a federal EIN (Employer Identification Number) which is required by all entities, regardless of structure.

   - This article provides the reader with the available structures with which to form their practice, including corporations, limited liability companies, subchapter S corporations, partnerships, and sole proprietorships. It defines each structure as well as listing the benefits and drawbacks to each, allowing the reader more insight into what structure may be most appropriate for the type of practice they wish to engage.

- This resource provides in detail how to create a structured business plan for a solo-practice, dictating the necessary attention to detail the practitioner must have. It serves as a template to ensure the firm is well planned and can be used as a document that serves to promote the ultimate vision of the firm, requiring them to put to paper estimated financials, advertising, specialization, etc.

6. *Continuing Legal Education*

- CLE’s are a requirement to keep one’s law license active. As a solo practitioner, it is the individual’s responsibility to stay current on CLE’s. This website by the American Bar Association provides resources on available CLE’s courses in person and online.
